Dear parent/carer

Re: Year 8 student illness

I am writing to you to clarify the situation related to two Year 8 students who fell ill at the Academy yesterday. The students attended hospital where medical staff enquired, via the students' parent/carers, if they had been in contact with carbon monoxide. We have reviewed activities which took place in the students' lessons and have monitored the rooms the students were in using carbon monoxide detectors. I can reassure you that no evidence of carbon monoxide has been found. No other students were impacted yesterday. We will keep the situation under review and update you if required.

Kind regards

Mr Ged Rae
Principal
